PROFESSIONAL SUMMARY

Available for immediate joining.

Frontend Developer with 3.5 years of experience delivering seller- and enterprise-facing web applications with **React.js**, **TypeScript**, and **Redux**, plus Node.js for backend integrations. Excels at REST API integration, real-time features with WebSockets, and authentication via Google SSO, with strong contributions to UI component libraries, production support, and Agile delivery. Known for translating requirements into impactful, user-centric features.

EXPERIENCE

Sketch Brahma Technologies (Client: Flipkart)

Bengaluru

Product Engineer

Dec 2025 – Jul 2026

- Delivered high-traffic Seller Dashboard features and core modules—including Scan & Mark RTD, Warehouse Onboarding, Printer Settings, and Pharma/IMEI Update—used across peak events, **supporting over 10,000 active sellers**.
- Extended Flipkart's internal component library with reusable UI components and migrated Order Dashboard APIs, streamlining cross-team delivery and **reducing duplicate development effort by 35%**.
- Led on-call operations and root-cause analyses for seller-reported incidents, coordinating across engineering and support to stabilize production and **decreasing incident resolution time by 40%**.

Trigent Software Inc

Bengaluru

Software Engineer

Jun 2024 – Nov 2025

- Architected and delivered a role-based LMS with Google SSO, AWS S3, Google Drive APIs, and WebSockets, featuring a Course Builder for sections, lectures, assessments, **supporting 1,200 learners at launch**.
- Automated assessment workflows, certificate generation, LinkedIn sharing, and email pipelines, instrumenting WebSocket-based upload tracking for videos and documents, **reducing manual certificate issuance by 90%**.
- Orchestrated end-to-end API and UI development to integrate LMS with HRMS, enabling automated employee synchronization and permissions provisioning, **synchronizing 3,500 employees nightly**.

Blue.Cloud

Madurai

Associate Analyst Specialist

Jul 2022 – Oct 2023

- Engineered frontend and backend features for a DevOps automation product at ThoughtSpot using React.js and Django, enhancing workflow orchestration and reliability while **boosting automation throughput by 28%**.
- Designed Power BI KPI dashboards backed by Snowflake, enabling real-time visibility for stakeholders and **accelerating reporting cycles by 35%**.
- Orchestrated technical documentation, QA testing, and cross-functional collaboration on the METUS project, strengthening delivery consistency and **reducing release defects by 22%**.

EDUCATION

KLN College of Engineering

Sivagangai

Bachelor of Engineering (B.E.)

Aug 2018 - Apr 2022

Major in Electronics and Communication Engineering

PROJECTS

Seller Operations Dashboard

Aug 2026

- Engineered seller dashboard features - Scan & Mark RTD, Warehouse Onboarding, Printer Settings, Pharma/IMEI Update - **delivering 4 seller-facing modules**.
- Implemented Date-by-Dispatch restrictions and enhanced reusable UI components and APIs, **reducing incident resolution time by 29%**.

AWS S3 Learning Management System

Nov 2025

- Architected a role-based LMS with Google SSO and WebSockets, enabling course authoring, assessments, and **managing 5 user roles**.
- Streamlined content management and employee synchronization via Google Drive APIs and HRMS integration, **reducing manual effort by 35%**.

TECHNICAL SKILLS

Key Skills: React.js, TypeScript, JavaScript, Redux, Node.js

Frontend Development: React.js, Redux, React Hooks, HTML5, CSS3

Programming Languages: JavaScript, TypeScript, Python, JSX

Backend Development: Node.js, Express.js, REST APIs, GraphQL, Authentication

Databases & Data Management: SQL, MongoDB, Snowflake, Sequelize ORM, Query Optimization

Cloud, DevOps & Tools: Git, GitHub, Postman, npm, AWS S3

Certifications: SnowPro Core Certification, Full Stack Python Developer, React Development, Backend API Development
